

This cross-sectional view shows a trench structure (60) formed in a substrate (51). The trench is filled with a material (61) and has a top surface (62). The substrate (51) is part of a larger structure (53) which includes a base layer (54) and a top layer (57). The trench is surrounded by a material (56) and is connected to a contact (55) on the base layer (54). The entire structure is covered by a protective layer (58) and a top layer (59).
